

2023 ANNUAL REPORT

FROM THE TEAM

Dear Friends of American Eagle Foundation:

For over 200 years, the Bald Eagle has served as a majestic living symbol of the United States. It was adopted as the national emblem by our country's Founding Fathers at the Second Continental Congress in 1782.

In the early 1960's, we almost lost this beautiful bird due to our own carelessness. The bald eagle's dramatic recovery from the brink of extinction is truly a conservation success story. Millions of Americans have a good reason to celebrate the eagles' thriving presence on our lands, waterways, and skies. In 2007 the bald eagle was removed from the Endangered Species list but despite the bird's status as our national symbol, it is still at risk in the country.

Vital funding is needed to further support, continue monitoring and safeguarding of the critical nesting and foraging habitats that is becoming scarce. Federal and State agencies are transferring more responsibility to the public for the preservation and care of our national bird. American Eagle Foundation is a non-profit citizens effort dedicated to conducting programs and creating an endowment fund that will ensure a secure and healthy future for this precious national treasure. More than ever before, support from public and private sponsors is now needed to keep eagle care, conservation, monitoring, and recovery programs going forward and progressing. With your help, we can keep our eagle's flying strong and free for generations to come!

Our highest gratitude and appreciation for all those who support us through memberships, donations, tours, sponsorships, and merchandise sales.

The success of American Eagle Foundation strongly relies on the dedicated support of those who share in our passion, vision, and mission.

Sincerely,

AEF Staff

NEW IN 2023

In 2023, we settled into our new home in Kodak, Tennessee. We proudly opened our Bird of Prey Museum and gift shop but most importantly, we opened our doors to our wonderful community.

Our brand-new facility sits on 47 spacious acres, giving us the opportunity to fulfill our mission of conservation, education, and protection like never before.

CONSERVATION

For the first time ever, AEF's conservation mission will take flight through our new gathering place where we can spend time with our beloved community. Our resident birds of prey are viewable to visitors in their spacious aviaries, and free-flighted bird programs will display the incredible abilities of native raptors. Families can enjoy walking trails, play areas, interactive exhibits, or even a stroll through our pollinator gardens.

Visiting our facility and meeting our feathered ambassadors will create a lasting impact, inspiring and instructing our guests on ways to join us in conserving raptors.

EDUCATION

Our headquarters includes a new educational facility that is sure to cultivate a lifelong passion for bald eagles and all birds of prey. Featuring dynamic and adaptable classrooms.

AEF has hosted field trips, workshops, and conferences. Our STEM-based and research-backed curricula will endow students with transferable skillsets and memorable, hands-on learning opportunities. To better serve local schools and youths, AEF's educational department will provide scholarships to ensure that conservation is accessible to all.

Our on-site studio has allowed our education initiative to spread its wings on digital platforms. Our pioneering video production and innovative livestreams will benefit not just learners but educators across the globe.

PROTECTION

AEF has released over 180 bald eagles back into the foothills of the Great Smoky Mountains and successfully rehabilitated many more birds of prey. At our future raptor rehabilitation clinic, our capacity to care for injured birds of prey will reach new heights. Outfitted with state-of-the-art veterinary equipment, resident veterinary experts, and skilled staff, our facility is sure to become the gold standard of avian rehabilitation.

Our iconic bald eagle propagation program was just the beginning. American Eagle Foundation will honor our longstanding history of species protection.

AND YOU

We invite individuals and organizations to join us in shaping the future of American Eagle Foundation and leaving a legacy for generations to come. Watch our website for additional information about charitable donations, sponsorship opportunities, commemorative engravings, and more!

EDUCATIONAL IMPACT

"In the end, we conserve only what we love. We will love only what we understand. We will understand only what we are taught."

Those words are as proper today as they were when Baba Dioum first spoke them in 1968 at the International Union for the Conservation of Nature and Natural Resources.

Education is a core pillar of American Eagle Foundation. To accomplish this, we present our live video HD cams on several Bald Eagle nests, where adults and children can watch eagle families go about their daily activities while caring for their young. An online chat is featured, whereby those watching the eagles can ask questions or share observations with others. Moderators and cam operators monitor this chat—individuals immersed in eagle knowledge, who welcome and help inform those who visit. Teachers are encouraged to set up a scheduled viewing time just for their class, so the students can ask all the questions they want in a friendly, welcoming environment.

At our brand-new headquarters in Kodak, TN, the sky isn't the limit for American Eagle Foundation's outreach. Here, learning—and fun—take flight through our unforgettable raptor experiences and engaging educational opportunities. Our offerings include guided tours, field trips, and group trips

AEF continues to carry out its outreach programs into hospitals, nursing homes, classrooms, parks, and corporate events with birds of prey shows featuring many of our non-releasable raptors (the stars of the show.) The caregiver/handlers of these birds are knowledgeable and entertaining and delight their audiences with stories unique to each bird and the species it stands for.

In 2023, AEF launched an interdisciplinary, ever-expanding series of curricula and supplementary content designed to inspire junior conservationists. Our digital programs use hands-on, interactive learning and transferable skillsets to nurture a passion for environmental stewardship. We seek to empower teachers and students alike to help us in conserving and protecting birds of prey.

Each lesson plan adheres to [Next Generation Science Standards \(NGSS\)](#), which allows for a seamless integration of our materials into classrooms nationwide. Our information comes from recent, peer-reviewed sources, and it is delivered by experienced staff with backgrounds in both avian care and teaching. Best yet, our offerings can be customized to fit your lesson plans!

EDUCATIONAL IMPACT

At Dollywood theme park located in Pigeon Forge, our Wings of America birds of prey show has educated millions of visitors, while providing a fast-paced, always entertaining hour of fun.

Challenger, the non-releasable, free-flying Bald Eagle has performed thousands of soul-stirring flights over stadiums and corporate events. He has inspired Senators and House Members; visited with the Secretary of the Interior, and even met United States Presidents. He has appeared on national TV shows and is undoubtedly the world's most recognized Bald Eagle. Challenger continues to appear at gloved events to advocate for his species, raising awareness about the Bald Eagle and what it stands for. Those who have been fortunate enough to see him fly experience a feeling of pride and patriotism.

It is up to every one of us to be torchbearers for the future, to speak for the animals, and to protect the planet for generations yet to come.

CONSERVATION IMPACT

The U.S. Fish and Wildlife, state agencies, conservation groups, and like-minded individuals must all do their part in protecting the Bald Eagle. One might say, “I know there are Federal and State laws in place to protect eagles, but what can I, as an individual, do to help?”

Actions include, but are not limited to the following:

- Organize a habitat cleanup with your community.
- Protect eagle habitats. Notify your local state wildlife agency if you notice a disturbance of an eagle nest habitat area by an individual or a corporation.
- Keep safe distances from their nests and roost site so as not to disturb eagles.
- If a nest is blown from a tree, help monitor and protect the area for up to 3 complete breeding seasons. Many eagles will rebuild the same nest or build a nest close by.
- Advocate for eagle friendly power lines in areas where eagles are present; write to your government officials to lobby against indiscriminate wind-turbines that kill thousands of eagles; avoid harmful pesticides that contaminate the environment and threaten wildlife.
- Landfill areas should immediately cover carcasses of euthanized animals to avoid other animals such as eagles being poisoned by them.
- Hunt and fish responsibly—Use alternative ammo or fishing apparatus.

American Eagle Foundation specifically engages in non-releasable bird care, Bald Eagle protection & advocacy, environmental clean-ups, and creating & managing a Nest Egg Fund to maintain AEF programs designed to help the Bald Eagle.

REHABILITATION IMPACT

AEF is currently raising funds for the Raptor Rehabilitation and Research Center (RRRC) Campaign, while we are working on securing funding for this most important asset, we cannot continue to rehabilitate injured raptors.

At our future raptor rehabilitation clinic, our capacity to care for injured birds of prey will reach new heights. Outfitted with state-of-the-art veterinary equipment, resident veterinary experts, and skilled staff, our facility is sure to become the gold standard of avian rehabilitation.

Through the Raptor Rehabilitation and Research Center (RRRC) Campaign, we invite individuals and organizations to join us in shaping the future, [click here to make a donation](#) or if you or your organization is interested in becoming a philanthropic donor or corporate sponsor of (RRRC), please contact the following:

Jessica A. Hall

Executive Director, American Eagle Foundation

GRANT PROGRAM

In 2022, American Eagle Foundation Bald Eagle Grants program is in its tenth year of funding efforts by scientists, agency personnel, and Non-Profit organizations to further our understanding and conservation of the Bald Eagle. To date, American Eagle Foundation has awarded **1,000,000** in grants to help insure the continued recovery of the Bald Eagle. Grants were first awarded in 2012, with about \$100,000 awarded yearly (no awards were granted for 2013 or 2020).

In 2022, a study partially funded by the [Bald Eagle Research Grant](#) rattled our understanding of bald eagles' thriving populations. According to this study, 47% of bald eagles and 46% of golden eagles had signs of chronic lead poisoning, which is the result of repeated lead exposure. As many as 33-35% of eagles had acute lead poisoning from exposure to high lead levels. These statistics came from samples taken across 38 states over the course of eight years (Slabe et. al, 2022).

A lead fragment the size of a grain of rice is lethal to a mature bald eagle, and the deadly metal accumulates in an eagle's system over the course of their lives, meaning that there is no safe amount of lead exposure. To learn more about the impacts of lead poisoning on bald eagle populations and what you can do to help, visit our [Lead Toxicity page](#).

2023 Grant funding is on hold

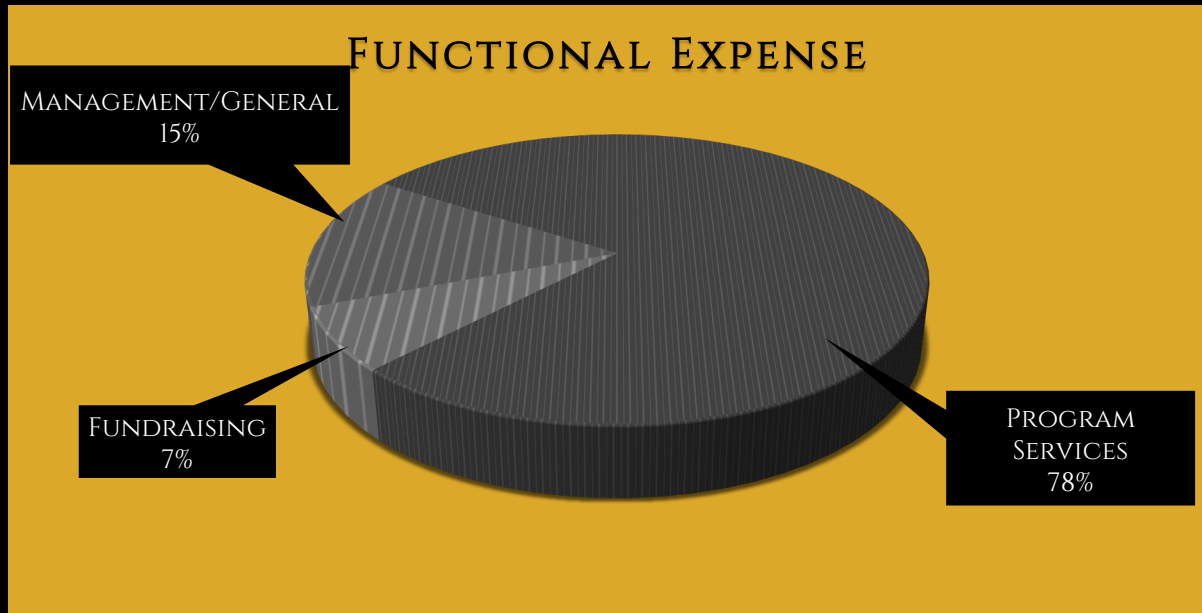

History of AEF Grants - American Eagle Foundation obtained funding for this grant program in 2004, when both the U.S. Senate and House UNANIMOUSLY passed the 'Bald Eagle Commemorative Coin Act.' Congress authorized the U.S. Mint to mint \$5 gold, \$1 silver, and \$0.50 clad commemorative coins, which they sold to the public in 2008.

These Coins celebrated the 35th anniversary of the Endangered Species Act of 1973, as well as the Bald Eagle's successful recovery in the U.S.A. The Act authorized surcharges collected from the sale of collectible Bald Eagle Commemorative Coins to be paid to AEF of Tennessee "to further its works," which includes grants for Bald Eagle Projects.
